

GANESH SHUKLA

MERN Stack Developer | JavaScript | React.js | Node.js | MongoDB

📞 8920113940 | ✉ ganeshukla15@gmail.com | 🔗 linkedin.com/in/ganeshukla | 📍 Noida

Summary

Final-year B.Tech Computer Science and Engineering student specializing in MERN Stack Development, with hands-on experience in JavaScript, React.js, Node.js, Express.js, and MongoDB. Interested in creating intuitive and responsive digital experiences by combining UI/UX principles with web development. Familiar with Figma, wireframing, prototyping, user flows, reusable UI components, and responsive design.

Projects

AI-Powered E-Commerce Recommendation Engine with Virtual Try-On

- Developed a full-stack e-commerce platform using four core technologies – React.js, Node.js, Express.js, and MongoDB – supporting product discovery, personalized recommendations, cart, and order management.
- Implemented a three-stage recommendation workflow – user interaction tracking, preference analysis, and personalized product ranking – to improve product discovery.
- Designed more than ten responsive UI screens covering home, search, product details, recommendations, virtual try-on, cart, checkout, profile, and order tracking.
- Built more than ten REST API endpoints across five or more modules including users, products, recommendations, cart, and orders, along with an AI-powered virtual try-on workflow.

Personal AI Knowledge Assistant

- Built a 3-stage AI knowledge pipeline for document ingestion, semantic retrieval, and context-aware question answering using React.js, Node.js, Express.js, and MongoDB.
- Implemented 5+ core modules including document upload, text processing, semantic search, AI question answering, and conversation history for personalized knowledge retrieval.
- Designed 8+ responsive UI screens covering authentication, dashboard, document management, search, AI chat, document preview, collections, and conversation history using Figma and React.js.
- Developed 10+ REST API endpoints for authentication, document management, knowledge retrieval, conversations, and user-specific data, enabling communication between frontend, backend, and AI services.

Technical Skills

Frontend: HTML5 • CSS3 • JavaScript • React.js • Responsive Web Design • UI Components

Backend: Node.js • Express.js • Rest APIs

Database: MongoDB • MySQL

UI/UX: Figma • Wireframing • Prototyping • User Flows • Design Systems • Responsive UI Design

Development Tools: Git • GitHub • VS Code • Postman • Figma • FigJam

Core Concept: DBMS • Computer Networks • SDLC • Operating Systems • Client-Server Architecture • RESTful Architecture

Education

IMS Engineering College

Bachelor of Technology in Computer Science and Engineering

Ghaziabad

2023 - 2027

Participated in Galgotias International Hackathon (TechFest 2025)

Demonstrating problem-solving, teamwork, and software development skills

Solved 100+ Data Structures & Algorithms problems on LeetCode

Demonstrating consistent problem-solving practice.
